

2025 Meridian Patient-Centered Medical Home (PCMH) Incentive Program

Meridian recognizes that health care goes beyond screenings and treatments and includes continuous and coordinated patient-first health care to empower patients to become active in their health care management. To reward forward-thinking clinicians like you, Meridian is pleased to share our Patient-Centered Medical Home (PCMH) Incentive Program.

Effective January 1, 2025, providers seeking **new** PCMH designation may be eligible for a \$500 incentive to help offset the cost of pursuing the designation. An application process may be required to receive this incentive. In addition, if you are interested in becoming a PCMH provider through the National Committee for Quality Assurance (NCQA), Meridian has developed a partnership with NCQA that provides a 20 percent discount on initial recognition application fees.

For more information about this and other provider incentive programs, please reach out to your Provider Network or Quality Representative.

Meridian maintains the right to modify or discontinue the PCMH Incentive Program at any time. Program funding for all lines of business is subject to change and updating at any time during the program year. Payments will not exceed budgeted amounts. Payments will be indexed as needed.
